

Mo Tiwari

mohittiwarinyc@gmail.com | (415) 234 – 3187
motiwari.com | U.S. Citizen

EDUCATION:

Stanford University, Stanford, CA **GPA: 4.2+** 2017 – Present
Ph.D. in Computer Science
Advisor: Sebastian Thrun
Received over **\$700,000** in fellowships and **\$150,000** in grants

M.S. in Computer Science (completed during Ph.D.) **GPA: 4.2+** June 2019

California Institute of Technology, Pasadena, CA **GPA: 4.0+** 2010 – 2013
Top **5%** of Graduating Class

B.S. in Mathematics with Honors **GPA: 4.0+** June 2013
B.S. in Physics with Honors **GPA: 4.0+** June 2013

Columbia University – Columbia College, New York, NY **GPA: 4.0+** 2009 – 2010

INDUSTRY EXPERIENCE:

SOFTWARE ENGINEER, TECHNICAL LEAD – FACEBOOK, INC. 2015 – 2017

- Technical lead of the team building ThreatExchange, Facebook's platform for sharing cybersecurity information
- Led product and feature development through 5 major releases that grew the number of enterprise customers from 92 to 500+
- Managed 3 interns who received and accepted fulltime offers

SECURITY RESEARCH SCIENTIST – EXPANSE, INC. (acquired for \$800MM) 2014 – 2015

- As the fifth fulltime employee, performed the first systematic, continuous, and Internet-scale capture and analysis of device data and security vulnerabilities
- Built backend and frontend infrastructure to help analysts understand terabytes of prostitution advertisements and uncover human trafficking
- Work indirectly led to arrests of dozens of human traffickers and rescue of victims

RESEARCHER – DRW TRADING GROUP Summer 2013

- Created valuation models for various financial instruments, such as interest rate swaps and swaptions

RESEARCHER – JOHN PRESKILL GROUP 2011 – 2012

- With Prof. John Preskill, Dr. Spiros Michalakis, Dr. Jeongwan Haah at Caltech, proved that a certain class of quantum systems would never function as a form of quantum storage, eliminating their viability in a quantum computer

RESEARCHER – LARGE HADRON COLLIDER (LHC)

Summer 2010

- Analyzed the first data from the Compact Muon Solenoid (CMS) experiment at the LHC, where the Higgs Boson was later discovered
- Discovered and corrected experimental defects by analyzing Missing Transverse Energy to calibrate experimental setups
- Later received admission to the Ph.D. program in Physics at MIT to continue research on this experiment

RESEARCHER – YORKTOWN HIGH SCHOOL

2007 – 2009

- Developed an assistive aid to help patients with physical disabilities complete exercises
- Device led to an 80% increase in patients' exercise completion rate and a 34% decrease in recovery time
- Won third place in category internationally at Intel ISEF 2009

OPEN SOURCE CONTRIBUTIONS:

- **BanditPAM:** <https://github.com/motiwari/BanditPAM>. **Primary author, 240+ stars.**
A high-performance Python package, written in C++, that implements the algorithm from our NeurIPS 2020 paper and is pip-installable via `pip install banditpam`.

TEACHING AND MENTORSHIP:

- **Course Assistant for Client-Side Internet Technologies (CS 193C):** Graded assignments, provided feedback, and answered questions for over 100 students each quarter during the summers of 2020 and 2021. Recruited top students for research projects.
- **EDGE Mentor:** Mentored three early Ph.D. students in Computer Science at Stanford University through a formal, funded appointment.
- **Ph.D. Student Mentor:** Managed over a dozen undergraduate, M.S., and junior Ph.D. students at Stanford University. Upward performance reviews available upon request.

INVITED TALKS:

- **Highlights of Algorithms 2021 (HALG21) Conference*:** “BanditPAM: Almost Linear Time k -Medoids Clustering via Multi-Armed Bandits.”
- **U.S. Food and Drug Administration*:** “An Introduction to Clustering, Multi-armed Bandits, and BanditPAM.”
- **Twitch*:** “Novel Data Augmentation, Multi-Armed Bandits, and more: New Machine Learning Techniques for Twitch Safety.”
- **C3.ai:** “ k -medoids Clustering and Multimodal Data Augmentation.”
- **Facebook:** “ThreatExchange v2.8 Webinar.” Joint presentation.
<https://www.youtube.com/watch?v=SVVC4ZLYHmk>
- **Microsoft Security Research Alliance:** “Tracking Advanced Persistent Threats with ThreatExchange.” Joint presentation.

** denotes a virtual talk*

ACADEMIC HONORS:

- Stanford Center for Open and Reproducible Science Innovator Prize 2021
 - 1 of 2 University-wide inaugural awardees
- Stanford Interdisciplinary Graduate Fellowship (SIGF) 2020 – 2023
 - Full funding for the Ph.D. for 3 years
 - 1 of 33 graduate student awardees, University-wide, in cohort
 - 1 of 295 awardees since award inception in 2008
- J.P. Morgan AI Research Ph.D. Fellowship 2020
- Oak Ridge Institute for Science and Education (ORISE) Fellowship 2019 – Present
- UnifyID Fellow (Declined) 2018
- Pear VC Fellow 2017 – Present
- NSF Graduate Research Fellowship Program Honorable Mention 2013
- Caltech Summer Undergraduate Research Fellowship (SURF) 2011, 2012
- IBM T.J. Watson Memorial Scholarship 2009 – 2012
- Caltech - San Pietro Travel Prize Recipient 2011
- I. I. Rabi Scholarship 2009 – 2010
- Intel International Science and Engineering Fair (ISEF) - Third place 2009
