## **ADDITIONAL RESEARCH EXPERIENCE:**

### **RESEARCHER – JOHN PRESKILL GROUP**

2011 – 2012

- With Prof. John Preskill, Dr. Spiros Michalakis, Dr. Jeongwan Haah at Caltech, proved that a certain class of quantum systems would never function as a form of quantum storage, eliminating their viability in a quantum computer

### **RESEARCHER – LARGE HADRON COLLIDER (LHC)**

Summer 2010

- Analyzed the first data from the Compact Muon Solenoid (CMS) experiment at the LHC, where the Higgs Boson was later discovered
- Discovered and corrected experimental defects by analyzing Missing Transverse Energy to calibrate experimental setups
- Later received admission to the Ph.D. program in Physics at MIT to continue research on this experiment

### **RESEARCHER – YORKTOWN HIGH SCHOOL**

2007 – 2009

- Developed an assistive aid to help patients with physical disabilities complete exercises
- Device led to an 80% increase in patients' exercise completion rate and a 34% decrease in recovery time
- Won third place in category internationally at Intel ISEF 2009
